

Environmental Policy

Environmental excellence is the responsibility of every employee at Reworld. By embracing this philosophy, we all can make a difference.

In accordance with our mission and purpose, we work to minimize the impact of waste management by reimagining, reducing, reusing, renewing, recycling and recovering our customers' waste.

We conduct our business in an environmentally sound manner that is protective of human health and prosperity.

We are committed to delivering sustainable waste solutions to our customers and partners in compliance with all applicable environmental laws, regulations, and obligations to protect the environment.

We will strive to exceed expectations and reduce risk in our operations through continuous improvement.

We will promote sustainable materials management to support a transition to a circular economy. We will achieve this by conserving natural resources and preventing pollution at the source, to the extent practicable.

We will ensure that all employees have the necessary information, resources, and training to make informed decisions to improve our environmental performance.
