

Landfill Diversion

460,000
tons of MSW
processed

Enough to fill
9
Epcot Balls

Or
56,200
garbage trucks,
bumper to bumper

Energy Recovery

172,000
MWh net
electricity export

Enough to power
16,000
homes for 1
year

Or, charge
40,000
Electric vehicles
for 1 year

Metal Recycling

13,600
tons of ferrous
metals

Equivalent to:
11,000
cars recovered
from steel

Paperclip chain
wrapped around
the earth
21 times

1,800
tons of non-
ferrous metals

122M
aluminum
cans

Energy savings from
avoided metal mining:
4.1M
gallons of gasoline

Net Greenhouse Gas (GHG) Avoidance

2.3 tons
of net CO₂e avoided*
for every ton of waste
diverted from landfill

978,000
metric tons of
GHGs avoided

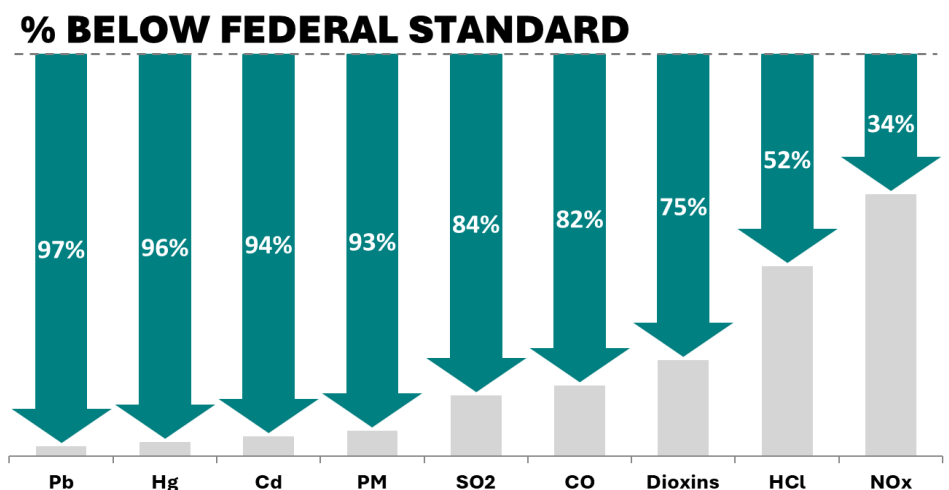

Equivalent to removing/displacing:
240,000
Vehicles
from roads

1.2B
Pounds of
coal

Environmental Compliance

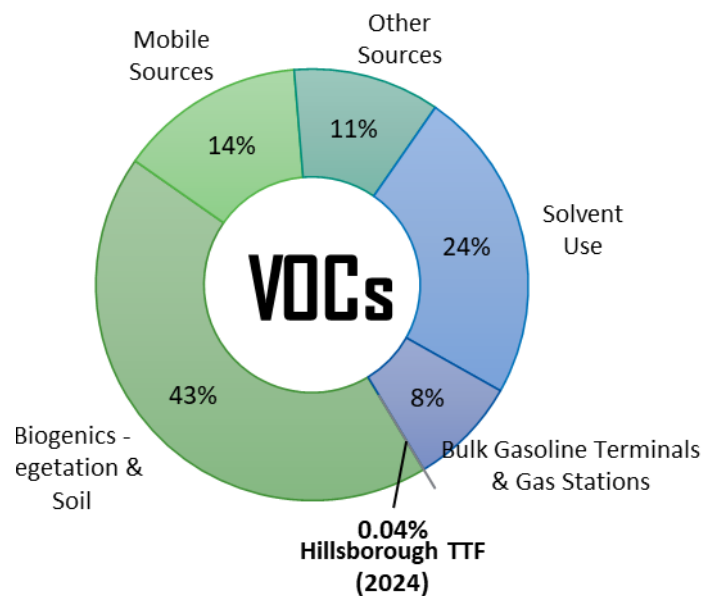

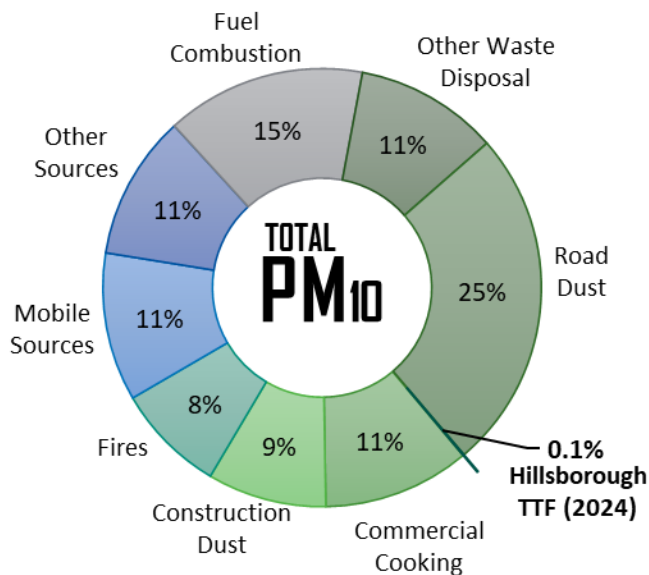

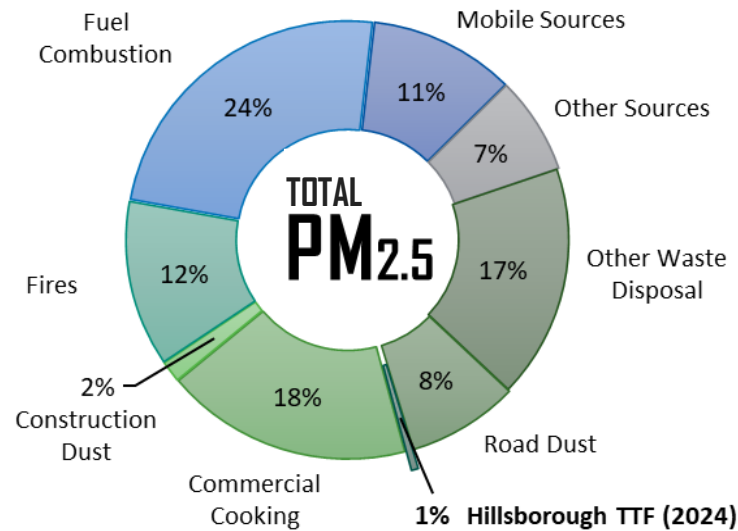

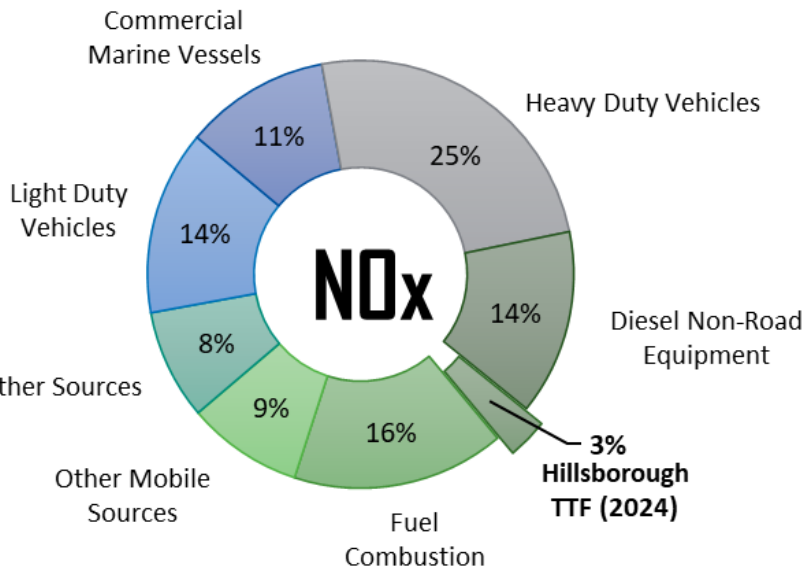

up to
97% below
Federal emissions
standards, based on
annual averages**

99.89%
compliant
with Continuous Emissions
Monitoring (CEMS) standards

How Do Our Emissions Compare to Other Sources in the County?

Local air emissions*** in Hillsborough, FL

* GHGs are represented in CO2equivalents (CO2e) using global warming potentials (GWPs) to compare the warming power of different gases. This analysis uses the 20-yr GWP for methane of 81 from the IPCC's 6th assessment report. TTFs in the U.S. reduce lifecycle emissions by an average of 2.4 tons of CO2e per ton of MSW diverted from landfills. The data presented here reflects facility-specific operating data and the local electrical grid, which can differ from the national average.

** 2022-2024 Average Annual Emissions compared to federal guidelines for existing facilities (40 CFR 60 Subpart Cb). Facility may be subject to more stringent requirements by permit or in accordance with other federal guidelines.

*** Based on the 2020 US EPA National Emissions Inventory; the most recently released complete inventory. Where available, the facility's 2020 emissions were replaced with the most recently reported 2024 emissions.
